

Woolacombe Surf Life Saving Club (WSLSC) Environmental Policy

We recognise that the success and enjoyment of our Surf Life Saving Club relies upon a healthy and thriving ocean and environment. In line with the [Devon Carbon Plan](#) and to support the [UN's Sustainable Development Goals](#) we, as a club aim to ensure that sustainability and the protection of the environment is an intrinsic part of how the club operates in order to minimise our impact as much as we can.

As a club, we have an opportunity to reach our members with positive environmental actions and messaging and make environmental sustainability an integral part of Woolacombe Surf Life Saving Club.

Club captains and the committee will intertwine this messaging into all aspects of training and club management.

This will include the following:

- 1. Adoption and distribution of an environmental code of conduct**

This will be intertwined with the WSLSC Code of Conduct for 2025

- 2. Creation of an annual WSLSC Environmental Plan**

To highlight environmental/sustainability actions/targets for the year and ensure a sustainability legacy for the club

- 3. Sustainability agenda item to each committee meeting**

Sustainability will be added as an integral check for all committee/club decisions going forward.
